

FOR IMMEDIATE RELEASE

Indecomm Document Management Group Hits 1,000 Counties for eRecording

Growth Sparked by New Integrations, IntelDoc Direct™ eRecording platform

- Footprint totals 1,000 active counties for eRecording
- Integrations with new land records software companies drive eRecording growth
- Indecomm streamlines recording for clients and newly integrated counties

St. Paul, MN – August 16, 2017 - Indecomm Global Services, a leading provider of business process as a service (BPaaS), software as a service (SaaS) technology, and learning products for the mortgage industry, is pleased to announce that its eRecording services are now available in 1,000 counties across the country. With this expanded footprint, Indecomm reaches 64% of the US population. eRecording is available in 1,700 counties of 3,600 recording jurisdictions nationwide. As of August 1, 2017, 80% of the US population lives in a recording district that is eRecording enabled, according to the Property Records Industry Association (PRIA).

“Indecomm focuses on the most populated counties and by doing so we assist the largest number of borrowers,” said Rajan Nair, CEO, Financial Services, Indecomm Global Services. “Indecomm’s electronic delivery of documents is important for our clients and our newly integrated counties as the industry as a whole moves toward digital mortgages.”

New integrations with land records software companies are giving Indecomm access to approximately one hundred and fifty counties and driving more growth. The ease and functionality of Indecomm's new eRecording platform InteleDoc Direct™ (IDD), combined with the industry's best recording fee calculator and checklist, are also strong contributors to the expansion of Indecomm's base. IDD is the only eRecording platform in the industry to offer an integrated recording knowledge base. IDD enables title companies, settlement agents, attorneys, and lenders to eRecord their real estate documents in a few easy steps with minimal data entry at any point in the process.

“Technological innovation has been at the heart of Indecomm's solutions for public and private entities,” Nair said. “Our accelerated growth with new county integrations demonstrates the value proposition of our model and brings it to the benefit of our clients and the public.”

For more than 30 years, the mortgage industry's leading title companies, lenders, and servicers have chosen Indecomm to provide them with superior technology-driven platforms and dedicated professionals with deep domain expertise in paper and electronic recording.
