

**FOR IMMEDIATE RELEASE**

## **Indecomm Global Services Document Management Group Surpasses**

### **700 County Milestone**

*Dedication to eRecording Shows New Results*

- Indecomm passes 700 mark
- Indecomm committed to growing efficient recording
- Indecomm serves the majority of recording jurisdictions currently offering eRecording

St. Paul, MN (September 23, 2014)—Indecomm Global Services, a leader in business process outsourcing, learning, and technology solutions, announces that its eRecording services are now available in more than 700 counties in the United States with the addition of Ramsey, Minnesota, and others. This is yet another milestone for Indecomm’s eRecording expansion team. These eRecording successes are accompanied with a growth in companion paper filings.

Indecomm has been steadily investing in eRecording across the country, moving from 600 to 700 counties in less than six months. Of the 3,600 recording jurisdictions nationwide, only 1,184 counties offer eRecording and Indecomm serves 59 percent of these jurisdictions. In terms of population, Indecomm serves 55 percent. This clearly shows that Indecomm is committed to serving all of the public and not just the largest counties. Indecomm’s footprint is broad and

deep, allowing Indecomm's customers to reach the majority of the counties and the majority of the population on one eRecording platform.

"Indecomm's efforts to make electronic recording available to the American public grows with conviction and consistency," said Rajan Nair, President, Financial Services Division, Indecomm Global Services. "Our passing the 700 mark is only one step on our path to making efficient recording services available at the lowest possible cost to the nation."

"This penetration of eRecording is larger than it appears at first," said Latha Parameswaran, Vice President, Operations, Indecomm Global Services. "Indecomm now covers the majority of the counties offering eRecording and the majority of the population. It is a dual achievement."

eRecording for Indecomm is part of its family of mortgage document management solutions. These include turnkey paper and eRecording services to image-based recording quality control and walk-in recording services.

### **About Indecomm Global Services**

Indecomm offers consulting, outsourcing, learning, and technology solutions to our clients in the financial services, hi-tech, life sciences, education, and publishing verticals.
