

FOR IMMEDIATE RELEASE

Indecomm Brings Total Risk Management Solutions to MBA's Risk Management, QA & Fraud Prevention Forum 2016

Proprietary SaaS Platforms and Services Enhance the Bottom Line

Highlights:

- Indecomm sponsors MBA's Risk Management, QA & Fraud Prevention Forum 2016
- Kaizen[®] and Income Analyzer risk management software highlighted
- Indecomm presents training for self-employed applicants

Edison, NJ – September 22, 2016 – Indecomm Global Services, a leader in business process outsourcing, learning, and technology solutions, will be showcasing its Risk Management Software as a Service (SaaS) technology solutions that are helping improve the quality and lower the risks associated with loan portfolios. The presentations will occur at the Mortgage Bankers Association (MBA) National Risk Management, QA & Fraud Prevention Forum 2016 held at the J. W. Marriott in Los Angeles, CA from September 28 - 30, 2016. Indecomm's [Kaizen[®]](#) and [Income Analyzer](#) SaaS web-based platforms and outsourcing services will be showcased at Booth No. 25.

“Regulators are driving towards metrics and a data driven approach to evaluate the quality of loans. This conference enables lenders to deal with the implementation of a more automated approach towards loan quality management,” said Rajan Nair, CEO, Financial Services, Indecomm Global Services. “Averages are no longer enough. Indecomm's solutions in

risk management and income analysis are specific to the individual lender and borrower. That's where Indecomm can really help."

Both Indecomm's Kaizen[®] risk management system featuring robust analytics and Income Analyzer (IA) with advanced logic to interpret income documents and data are powered by Optical Character Recognition (OCR) and control risk at the loan level. Lenders can access these solutions through the SaaS model or by outsourcing.

Kaizen takes in checklists, workflow, and data from dashboard and report modules and systematically categorizes the root cause of any defects. This enables lenders to correct the issues before they become systemic. Kaizen can be used for quality control, whole loan purchases, and many processes in between.

"Clients using Kaizen view the real time reporting and the automated rebuttal process as key elements of their success," Nair said.

Income Analyzer is also a platform for risk management. It provides a lift in efficiency for underwriters while mitigating deficiencies in income calculation, especially for self-employed borrowers. IA electronically reads, analyzes, and calculates income from a borrower's documents, and in the process, identifies areas of concern. Additionally, Income Analyzer offers a total solution for self-employed income by providing access to Indecomm's robust series of self-employed training as part of each client onboarding.
